- Java
- C
- Javascript
- HTML
- CSS
- SQL

Web Development Tools:

- ReactJS
- NodeJS
- MongoDB
- ExpressJS
- Bootstrap
- CSS

CERTIFICATIONS

- DSA and Java Development by IT World Education
- Web Development by IT World Education

As a Computer Science student, I'm dedicated to continuous growth, seeking a role that fosters learning and skill refinement to develop as a Software Developer. Proficient in Java, C, with experience in Web Development and backend technologies, I bring a strong technical skill set. Proactive, driven, and eager to contribute meaningfully to teams and projects.

PROJECTS

MAJOR PROJECT:

Recently worked on optimising the paddy procurement system in India by incorporating the features of blockchain so as to create a dynamic, secured and transparent network. This uses the Ethereum blockchain network for creating the transactional records which can be accessed in a more convenient manner through the interface created using ReactJS, CSS, NodeJS, Solidity and MongoDB.

IMDB CLONE :

Developed a React-based IMDb clone web app that allows users to browse popular movies, view detailed movie information, and access IMDb and movie homepages.

E-COMMERCE WEBSITE:

Developed a full-stack e-commerce platform using Vite for the frontend and Firebase for authentication and storage of data. Also used RazorPay for doing payment.

SPOTIFY CLONE:

Developed a spotify clone which integrates the Spotify API that helps in user authentication and authorization and incorporates the functionalities of viewing and playing songs in the Spotify playlist in my original Spotify account. I have used React.js and CSS for creating the interface.

AWARDS

- Finalists of SIH 2023
- Earned 2nd prize in branch Quiz Competition.
- Participated in Google Cloud Skill Boost Arcade Event
- Participated in Google Cloud Career Practitioner Program.
